

Move a Sharepoint List to Confluence

I have moved a list over DVD and BD film from Sharepoint to Confluence making this Calculated field in the Sharepoint List:

```
" | "&[Original Titell]&" | "&[Dansk Titell] &" | "&[Produceret År]&" | "& [TV Kopi] &" | "& [Blu-Ray]&" | {imdb:id=" & [IMDB Nummer] & " } |"
```

This concats all needed fields to one field, and the output can be copied into a Confluence Page:
