

JIRA Icons

Here are different Icons for Projects, IssueTypes and Priority - Partly with [Gimp](#) or [Acorn](#) files

IssueType Icons has a size: 16x16 pixles

Project Logo's size: 50x50 pixles

Notice that using an alternate size logo works fine; JIRA Scales it - but I have seen PDF renderings (as in exports) that looked pretty bad due to Logo size.
