

Add Button to Confluences Header

This script will add a Button to the header. A typical place to place it would be in "Custom HTML"

```
<script>
AJS.toInit(function(){
  AJS.$('.au-header-primary .au-nav').prepend('<li><a href="http://www.atlassian.com" class=" au-nav-
imagelink">Atlassian</a></li>');
});
</script>
```
