THE FLYING SCOTSMAN

By Da Mangos

THE FLYING SCOTSMAN
LNER
4472

The Flying Scotsman.

The two-time world-record breaking Flying Scotsman has been created out of LEGO. This LEGO model was based on the LNER Class A3 4472 Flying Scotsman model that ran from 1924 to 1948, that was later restored in 1968, 1996 and 2016. The Flying Scotsman was a British passenger locomotive that ran first ever stop journey from King's Cross to Edinburgh Waverley, a distance of nearly 400 miles in just 8 hour. On November 30th 1934, the Flying Scotsman became the first ever locomotive to reach 100 miles an hour and thus setting the world record and getting her name in the history books. However, she wasn't done there! She would then go on to set another world-record as the longest non-stop journey by a steam locomotive.
