

# Howto Change a Project (or multiple projects) outgoing email

Via Scriptrunner for all projects:

```
import com.atlassian.core.ofbiz.util.OFBizPropertyUtils
import com.atlassian.jira.component.ComponentAccessor

def newAddress = "newEmail@example.com"
ComponentAccessor.projectManager.projects.each {
    def email = OFBizPropertyUtils.getPropertySet(it.getGenericValue())
    email.setString("jira.project.email.sender", newAddress)
}
```

Via scriptrunner for a single project

```
import com.atlassian.core.ofbiz.util.OFBizPropertyUtils
import com.atlassian.jira.component.ComponentAccessor

def newAddress = "newEmail@example.com"
def project = ComponentAccessor.projectManager.getProjectByCurrentKey("ATG")

def email = OFBizPropertyUtils.getPropertySet(project.getGenericValue())
email.setString("jira.project.email.sender", newAddress)
```
