

Blog cache issue ..

I have had som faults regarding cache and/or blogs, as Chrome states:

 330 ERR_CONTENT_DECODING_FAILED

But typically, its "only" for blog post, and a clue is for sure:

 Caused by: java.lang.ClassCastException: com.atlassian.confluence.pages.Page cannot be cast to com.atlassian.confluence.pages.BlogPost

Catalina show the errors:

```

Flushing the cache from the Administration module seems to help - maybe the cache should be disabled like in <https://developer.atlassian.com/display/CONFDEV/Disable+Velocity+Caching>
