

How to Color Your Transition Buttons

Direct Styling

You can add html on the Jira Screen (use the Developer mode or look at the workflow i Jira to find Transaction Ids):

```
<style>
/* Close */
#action_id_251 {background-color: #ff0000; color: #ffffff}
/* Candel */
#action_id_201 {background-color: #ff0000; color: #ffffff}
/* Submit */
#action_id_11 {background-color: #00ff00; color: #000000}
#action_id_381 {background-color: #00ff00; color: #000000}
/* Start Deployment */
#action_id_311 {background-color: #00ff00; color: #000000}
/* Decline */
#action_id_21 {background-color: #00ff00; color: #000000}
</style>
```

Or You can add a Javascript the colors the buttons by button text:

```

<script>

// https://www.w3schools.com/cssref/css_colors.asp

AJS.$(document).ready(function(){

var elements = document.getElementsByClassName("trigger-label")

for (var i = 0; i < elements.length; i++) {

    //alert (elements[i])

    switch(elements[i].innerHTML.toLowerCase()) {

        case "close":
        case "close issue":
            elements[i].parentNode.style.backgroundColor="CornflowerBlue";
            elements[i].parentNode.style.color="white";
            break;

        case "cancel":
            elements[i].parentNode.style.backgroundColor="CornflowerBlue";
            elements[i].parentNode.style.color="white";
            break;

        case "resolve":
        case "resolve issue":
            elements[i].parentNode.style.backgroundColor="LightGreen";
            //elements[i].parentNode.style.color="white";
            break;

        case "submit for review":
            elements[i].parentNode.style.backgroundColor="LightGreen";
            //elements[i].parentNode.style.color="white";
            break;

        case "submit for authorization":
            elements[i].parentNode.style.backgroundColor="LightGreen";
            elements[i].parentNode.style.color="white";
            break;

        case "set in progress":
            elements[i].parentNode.style.backgroundColor="Green";
            elements[i].parentNode.style.color="white";
            break;

        case "change priority":
            elements[i].parentNode.style.backgroundColor="CadetBlue";
            elements[i].parentNode.style.color="white";
            break;

        case "bounce to customer":
            elements[i].parentNode.style.backgroundColor="LightSalmon";
            break;

        case "assess issue":
            elements[i].parentNode.style.backgroundColor="PaleGoldenRod";
            break;

        case "bounce to customer":
            elements[i].parentNode.style.backgroundColor="PapayaWhip";
            break;

    }
}
});
</script>

```
