

Copy a Jira Project with Scriptrunner REST

The builtin Script "Copy Project" can be used with REST:

copyProject.sh

```
curl -u admin:Welcome1 -H "Content-Type: application/json" -H "X-Atlassian-Token: nocheck" -d @copyProject.json  
http://jira.server.dk/rest/scriptrunner/latest/canned/com.onresolve.scriptrunner.canned.jira.admin.CopyProject
```

The Json Payload:

copyProject.json

```
{ "FIELD_SOURCE_PROJECT": "TEST", "FIELD_TARGET_PROJECT": "TEST2", "FIELD_TARGET_PROJECT_NAME": "A copy of TEST", "  
canned-script": "com.onresolve.scriptrunner.canned.jira.admin.CopyProject" }
```

See the Confluence Copy Space [here](#)
