

The Logs

<http://www.mos-eisley.dk/logs/catalina.out>

<http://www.mos-eisley.dk/logs/atlassian-confluence.log>

This makes it so much easier to access the logs, use:

```
bnp@moserver:/opt/confluence/confluence$ sudo mkdir logs  
[sudo] password for bnp:  
bnp@moserver:/opt/confluence/confluence$ cd logs  
bnp@moserver:/opt/confluence/confluence/logs$ sudo ln -s /opt/confluence/logs/catalina.out catalina.out  
bnp@moserver:/opt/confluence/confluence/logs$ sudo ln -s /data/confluence/logs/atlassian-confluence.log  
atlassian-confluence.log
```

Also, remember to allow Tomcat to follow links.
