

User Macro: me-video - Linking to a Video file

This links to a video file on the filesystem, using an thumbnail image as thumbnail. This is not very optimal, as the browser will load the entire file before starting to play.

Name	me-video
Macro Body Processing	No macro body
Output format	HTML

Code

```
## @param path:title=Status|type=string|required=true|desc=File Path
## @param image:title=Image|type=string|required=true|desc=Image Name
## @param thumbsize:title=Thumbsize|type=string|required=false|desc=Thumbnail Size
## @param displaysize:title=Displaysize|type=string|required=false|desc=Display Size

## Default Thumb and Display Sizes:
#set($ThumbSizeDefault=200)
#set($DisplaySizeDefault=800)

#if ($paramthumbsize != "" )
#set($ThumbSizeDefault=${paramthumbsize})
#end

#if ($paramdisplaysize != "" )
#set($DisplaySizeDefault=${paramdisplaysize})
#end

<a href="/images/${parampath}${paramimage}" title=""></a>
```
