

CSS For Confluence 4.X

In general, this is kind of reverse engineering and some test, fail, test until everything looks ok in browsers 😊 I have not found a CSS reference for Confluence.

See the [CSS Styling Samples for Confluence 4.X](#) pages for some sporadic examples

Theme	Object	CSS style	Comment
Easy Reader	Width of Site	<code>#full-height-container { width:1200px; }</code>	Change from 980px to 1200px
All	Hide menu	<code>.ajs-menu-bar { display:none; }</code>	Can be used with the Visibility Plugin to hide menu for Anonymous users
All	Hide Likes and Labels	<code>.likes-and-labels-container { display: none; }</code>	Can be used with the Visibility Plugin to hide menu for Anonymous users
All	Top header background	<code>#com-atlassian-confluence #header { background-image: url('http://www.mysite.dk/download/attachments/4161541/top_gul.jpg') }</code>	
All	Metadata (attachments, changed time etc)	<code>.page-metadata { display: none; }</code>	
All	More links	<code>.more-link-container, .more-link-base</code>	
	recently-updated macro	<code>.recently-updated-concise .update-item-desc, .recently-updated-concise .update-item-date, .recently-updated-concise .update-item-changes { display:none; }</code>	Hide different part of text rendered from the macro
