Themes

Build In Themes

Theme	Comment
Main Theme	The Main Theme - this is a full with Theme, hence content placement is partly based on the size of the users screen. Acceptable as external site
Documentation Theme	The Documentation Theme - this is a full with Theme, hence content placement is partly based on the size of the users screen. General not very acceptable as external site, unless documentation is the main requirement. This sidebar can be configured as a page, which adds flexability a lot, se Placing Resources for ideas of placing the sidebar page.
Easy Reader Theme	The Easy Reader Theme - this is a fixed with Theme, hence content placement is pretty controlable, making it *my favorite as an external site*. Review CSS For Confluence 4.X for setting the width.
