

Replace Create Button With Custom and custom dialogbox

```
<script language=Javascript>
<!-- AJS.$("#create-page-button").hide(); -->

// Note this is a small dialog, so it fits in the Sandbox panel
// Standard sizes are 400, 600 and 840 pixels wide
var dialog = new AJS.Dialog({
    width: 400,
    height: 300,
    id: "example-dialog",
    closeOnOutsideClick: true
});
// PAGE 0 (first page)
// adds header for first page
dialog.addHeader("Dialog - Page 0");
// add panel 1
dialog.addPanel("Panel 1", "<iframe src='http://isalive2.fmk.netic.dk/fmk_online_prod'></iframe>", "panel-body");
// You can remove padding with:
// dialog.get("panel:0").setPadding(0);
// add panel 2 (this will create a menu on the left side for selecting panels within page 0)
dialog.addPanel("Panel 2", "<p>Some content for panel 2.</p><div style='height: 2000px;'>(forced-height element to demonstrate scrolling content)</div><p>End.</p>", "panel-body");
dialog.addButton("Next", function (dialog) {
    dialog.nextPage();
});
dialog.addLink("Cancel", function (dialog) {
    dialog.hide();
}, "#");
// PAGE 1 (second page)
// adds a new page to dialog
dialog.addPage();
// adds header for second page
dialog.addHeader("Dialog - Page 1");
// adds a single panel on second page (as there is only one panel, no menu will appear on the left side)
dialog.addPanel("SinglePanel", "<iframe src='http://isalive2.fmk.netic.dk/fmk_online_prod'></iframe>", "singlePanel");
// add "Previous" button to page 1
dialog.addButton("Previous", function(dialog) {
    dialog.prevPage();
});
// adds "Cancel" button to page 1
dialog.addButton("Cancel", function (dialog) {
    dialog.hide();
});
// Add events to dialog trigger elements
AJS.$("#create-page-button").attr("href", "Javascript:return false();");
AJS.$("#create-page-button a").click(false);

AJS.$('.lui-nav').append("<li><a id='newcreate' href='Javascript:return(false);' class='lui-button lui-style lui-button-primary lui-nav-imagelink'><span>Create</span></a></li>");
AJS.$("#newcreate").click(function() {
    // PREPARE FOR DISPLAY
    // start first page, first panel
    dialog.gotoPage(0);
    dialog.gotoPanel(0);
    dialog.show();
});

</script>
```
